

1.8 Dilations with a Center at the Origin → dilate around (0,0).

Dilations Versus Stretches Versus Shrinks

- A dilation affects BOTH the x and the y value.
- A horizontal stretch or shrink affects only the x.
- A vertical stretch or a shrink affects only the y.
- A stretch is when you multiply the x or the y value by a number greater than 1.
- A shrink is when you multiply the x or the y value by a number $0 < \# < 1$ (greater than 0, less than 1).

$k = \text{Scale Factor}$

Rules

Dilation:

$(x,y) \rightarrow (kx, ky)$

Horizontal stretch or shrink:

$(x,y) \rightarrow (kx, y)$

Vertical stretch or shrink:

$(x,y) \rightarrow (x, ky)$

1) Dilate by a scale factor of $\frac{1}{2}$.

$J(-2,-3) \rightarrow J'(-1,-1.5)$

$E(-2,-4) \rightarrow E'(-1,-2)$

$N(3,-3) \rightarrow N'(1.5,-1.5)$

$(x,y) \rightarrow (\frac{1}{2}x, \frac{1}{2}y)$

$m(1,-2) \rightarrow m'(\frac{1}{2}, -1)$

2) What is the rule that represents this transformation?

$(x,y) \rightarrow (\frac{1}{2}x, \frac{1}{2}y)$ OR $(\frac{x}{2}, \frac{y}{2})$

3) If $A(3, 5)$ & $B(3, 9)$ is dilated by a scale factor of 3, what are the coordinates of the image?

$(x,y) \rightarrow (3x, 3y)$
*multiply x & y by 3.
 $A(3,5) \rightarrow A'(9,15)$
 $B(3,9) \rightarrow B'(9,27)$

4) If \overline{AB} is horizontally stretched by a scale factor of 2. If $A(-2, 0)$ and $B(3, 1)$, graph the image.

$(x,y) \rightarrow (2x, y)$
*mult. x by 2.
 $A(-2,0) \rightarrow A'(-4,0)$
 $B(3,1) \rightarrow B'(6,1)$

5) What rule represents this transformation?

$(x,y) \rightarrow (2x, y)$

6) If \overline{AB} is vertically shrunk by a scale factor of $\frac{1}{3}$. If $A(3, 1)$ and $B(-2, 3)$, graph the image.

$(x,y) \rightarrow (x, \frac{1}{3}y)$
*mult. y by $\frac{1}{3}$.
 $A(3,1) \rightarrow A'(3, \frac{1}{3})$
 $B(-2,3) \rightarrow B'(-2, 1)$

7) What rule represents this transformation?

$(x,y) \rightarrow (x, \frac{1}{3}y)$
